PART 1. -- GENERAL

101. AGO REGULATION 95-2 --AGO Regulation 95-2, dtd 1 Dec 72 is hereby rescinded.

PART 2. -- PERSONNEL

201. TECHNICIAN VACANCY--The following technician vacancy is announced in the Montana Army National Guard. Refer to technician vacancy announcement posted on unit bulletin boards for details.

<u>POSITION AND GRADE</u>	<u>LOCATION</u>	<u>CLOSING DATE</u>
Accounting Technician	Helena MT	8 Nov 74

202. OFFICER AND WARRANT OFFICER SELECTIVE RETENTION.--Change 1, NGR 635-102, provides that at the discretion of the State Adjutant General all officers may be considered for selective retention on an annual basis. It is the policy of this State that consideration will continue on a biennial basis.

PART 3. -- OPERATIONS AND TRAINING

301. MMA CLASS XIX.--The Montana Military Academy will be starting OCS Class XIX on or about 14 June 1975. Now is the time to begin thinking about sending a candidate to OCS. The target size for this year's class is again 20 to 25 students. From the look of things there will be plenty of officer openings by 1976. The basic requirements are:

- Age - 18 - 28 (waiver up to 30)
- A 110 on the GT score (other tests to come later)
- Good physical condition
- Desire to complete the course

You are urged to contact MAJ Leon G. Schneider at P.O. Box 1157, Helena or telephone 449-3690 if you have questions, need applications or just want to talk about OCS. Your help is deeply appreciated.

PART 4. -- SUPPLY

401. CAN, GASOLINE, NSN 7240-00-222-3088.--a. Defense General Supply Center is having problems in obtaining stock replenishment of subject containers. This causes an out-of-stock position and a sizeable back order position. New procurement cannot be expected to alleviate this situation until after January 1975. Upon receipt of new procurement the price will increase from \$3.82 to approximately \$8.00 per can.

b. As a result of the above, the center has taken action to repair unserviceable cans for issue as Code B items (Serviceable-Issuable with qualification). This program will provide the necessary items at a much lower cost than will be possible later.

c. Therefore, replacement issues of gas cans will be made only upon turn-in of a like quantity of unserviceable gas cans.

d. Request all users be alerted to the proper care in handling and storage to reduce physical damage to the interior and exterior of cans.

402. USE OF LOGISTICS CONTROL CODES.--a. Logistics Control Code (LCC) identified in SB 700-20, is the proper code to use when flagging property book pages in accordance with paragraph 2-7j, AR 710-2.

b. Logistics Control Codes are those codes previously published, and still referred to in AR 710-2, as Type Classification Codes. When flagging property books these codes should not be confused with the Type Class Code which also appears in SB 700-20.

403. NEW DD FORM 200.--a. DD Form 200, Report of Survey, December 1973, replaced previous editions of June 1959. The old form may continue to be used.

b. Big change in form is that a "unit cost" column was added thus renumbering of blocks was necessary.

404. CTA AUTHORITY FOR THE M76 REDEYE TRAINER.--An October 1971 message, dtg 152225Z Oct 71, from CG, CONARC, to Major Commands, added to CTA 23-103, 19 January 1970, the following item:

"Training Set Guided Missile System (REDEYE) M76, LIN XC4518. BOI is: "Per TOE authorized REDEYE section in headquarters."

405. ETCHING SERIAL NUMBERS ON M16 SERIES RIFLE BOLTS.--USAARMCOM has informed the NGB that etched-in serial numbers on these parts is not authorized. Bolt carriers should continue to be tagged per NGR 190-11.

406. FORMER CTA 130-7 AUTHORIZED ITEMS.--Items formerly authorized in CTA 130-7 that were not picked up in the CTA 50-900 series but are still required, should be listed and submitted for inclusion in a change to the MTOE/TDA/MIDA in accordance with AR 310-49, or for inclusion in the appropriate CTA pursuant to the provisions of AR 310-34. All equipment on hand must have an authorization in an appropriate TAADS document. No interim authority can be granted for retention of unauthorized equipment unless a change to the MTOE/TDA/MIDA/CTA has been formally requested.

407. INDUSTRIAL TOWEL SERVICE ENDS.--Industrial Towel Service to shops and activities will end effective 15 November 1974. Paper towels NSN 7920-00-000-0218 will replace cloth towels in the same quantity as the cloth towels. Paper towels will be carried in USFFC Warehouse Stock.

PART 5. -- FISCAL AND TRANSPORTATION

PART 6. -- MAINTENANCE

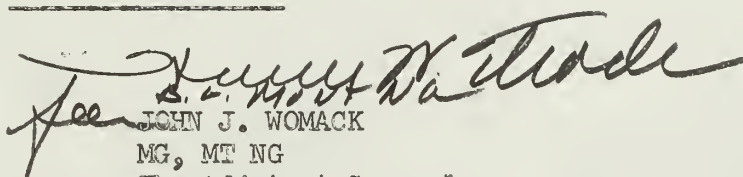

601. MODEL R6602 GAS ENGINE.

a. It has been noted that the Model R6602 gas engine mounted in M52, M54, M55, M62 and M543 vehicles generally uses an excessive amount of oil. This problem was discussed with a representative of Tank Automotive Command. The following recommendation was made by TACOM:

"A smooth running engine with no loss of power, good compression(110 pounds) and good spark plug color should not be changed for reason of oil consumption along. A high oil consumption has been a constant problem with this engine, even those engines that have been through depot rebuild. It is the opinion of TACOM that these engines should continue in service as long as oil consumption is the only fault."

b. The above information plus ESC limitations should be reviewed prior to any evacuation of a vehicle containing this engine to CSMS.

PART 7. -- SAFETY
